SAUGET - Flood Damage Survey

TO: Division of Water Pollution Control, Field Operations Section & Records Unit

FROM: Eric W. Merz, Region VI, Collinsville

DATE: February 12, 1983

INDIVIDUALS PRESENT: Mr. Ron Buddecke - Federal Emergency Management Agency (FEMA)
Mr. Bobby Lane - FEMA Consultant
Mr. Rich Burback - P.H. Weis & Assoc. - Sauget Village Engineers
Mr. Paul Weis - P.H. Weis & Assoc. - Sauget Village Engineers

On the above date, the writer met with the above individuals to discuss damage to the Sauget sewers as the result of recent flooding (12/2/82 to 1/4/83). The request for a flood damage survey was the result of Illinois appealing to the Federal government to reconsider their decision of not declaring St. Clair County as a disaster area.

Following the meeting, the areas where damage allegedly occurred were visited. Photos were taken and the attached Damage Survey Reports (DSR's) were completed.

The information supplied on the reports is self explanatory. FEMA will review the DSR's and other pertinent information and recommend whether St. Clair County should be included in the flood damage disaster area.

The above is for your information.
